PROFESSIONAL SUMMARY

PMP-certified Telecom IT Project Manager with experience across project delivery, business analysis, full-stack development and quality assurance. Manage budgets up to USD $7M and cross-functional teams of 30+ across onshore and offshore locations. Led a Matrixx charging and billing migration into production on schedule for a major Canadian telecommunications provider. Current delivery responsibilities include ServiceNow ITSM and CSM implementations and AI integration initiatives. Career goal: transition into forward deployed engineering, combining customer discovery, hands-on development and enterprise delivery.

CORE EXPERTISE

Telecom IT Delivery | Matrixx Migration | ServiceNow Implementations | AI Integration Delivery | Scope and Schedule Management | Budget and Resource Planning | Risk and Dependency Management | Stakeholder and Vendor Coordination | Agile and Hybrid Delivery | Requirements Analysis | UAT and Production Cutover

PROFESSIONAL EXPERIENCE

PRODAPT SOLUTIONS INC. | Toronto, ON

Project Manager | May 2025–Present

Manage Matrixx and ServiceNow projects for a major Canadian telecommunications provider, coordinating business stakeholders, technical teams and vendors.

- Led a Matrixx charging and billing migration through on-schedule production go-live, coordinating delivery milestones, business acceptance and cutover readiness.
- Manage budgets up to USD $7M and cross-functional teams of 30+ across business analysis, development, QA and infrastructure.
- Manage ServiceNow ITSM and CSM implementation delivery and AI integration initiatives, coordinating scope, technical dependencies and stakeholder priorities.
- Maintain integrated plans covering schedules, resources, risks, issues and change requests; report project health and delivery decisions to client and internal leadership.
- Coordinate requirements and process mapping for migrating charging, rating and billing rules from legacy systems to Matrixx.
- Oversee migration validation and UAT, coordinating defect resolution and stakeholder sign-off before production deployment.
- Coordinate vendor activities, production readiness and transition to support, clarifying operational ownership and post-release actions.

Tools and platforms: Matrixx, ServiceNow, Jira, Confluence, Microsoft Project, Microsoft Visio

IBM INDIA PVT. LTD. | Bengaluru, India

July 2010–December 2022 | Progressed from QA to business analysis, followed by concurrent development and project-management responsibilities. Contributed to an established telecom program spanning more than five years.

Full Stack Developer and Project Manager | March 2021–December 2022

- Combined hands-on development with project management for enterprise application delivery, coordinating scope, schedules and dependencies across development, QA and infrastructure.
- Contributed to a SaaS multi-tenant platform using .NET Core, React.js and AWS, translating business requirements into application functionality.
- Coordinated API delivery and authentication requirements with business and technical stakeholders, supporting security reviews, testing and acceptance.
- Supported legacy-to-microservices migration planning, Agile ceremonies, CI/CD adoption and release readiness.

Business Analyst | November 2015–March 2021

- Gathered and analyzed telecom business requirements, producing business and functional specifications, process flows, user stories and acceptance criteria.
- Facilitated stakeholder workshops to clarify scope, identify process gaps and prioritize requirements with business and technical teams.
- Maintained requirements traceability through development and testing, supporting UAT planning, defect clarification and business acceptance.

Quality Assurance | July 2010–November 2015

- Developed and executed functional and regression test scenarios for telecom applications, validating business workflows and documenting defects.
- Supported automated testing and worked with developers to investigate issues, verify fixes and communicate release-quality risks.

CAREER BREAK

Higher Education and Relocation to Canada | January 2023–May 2025

Completed postgraduate studies in Project Management and Data Analytics, strengthening delivery planning, governance and performance reporting capabilities.

CERTIFICATION

Project Management Professional (PMP) | Project Management Institute

EDUCATION

Post Graduate Diploma in Data Analytics | Durham College, Ontario | 2024

Post Graduate Diploma in Project Management | Canadore College, Ontario | 2023

Bachelor’s Degree in Electrical and Electronics Engineering | SASTRA University, India | 2010

TECHNICAL KNOWLEDGE

Delivery tools: Jira, Confluence, Microsoft Project, Microsoft Visio, Azure DevOps
Application technologies: .NET Core, React.js, REST APIs, microservices
Cloud and testing: AWS, Azure, Selenium, Postman, SOAP UI
